

Closet Corner Shelving Setup

Closet corners can be created by attaching two Top Shelves together with the included Brackets, and Hanging Rod Support. This setup allows you to utilize 100-percent of the closet corner, eliminating the need for a separate corner unit. 8 Brackets and 1 Hanging Rod Support is included with each Closet Organizer System.

Important :

- **Since the closet organizer is made with hard and dense solid wood, pre-drill pilot holes with 1/8" bit before attaching the screws to avoid splitting the wood.**
- For smoother cuts, use masking tape (painter's tape) on the wood panel surface before making the cut .

Thank you for choosing SolidWoodClosets.com
